ArthurAI™ Family Learning Edition FLE

HOME-SCHOOLING FAMILIES

Arthur teaches. *You decide* what he's allowed to teach.

ArthurAI FLE gives each child their own profile on the same reasoning core universities run — and gives you the controls: whether the tutor is on for that child at all, how long they study, and what level they work at.

ILLUSTRATIVE VIEW OF SHIPPED FEATURES · DEMO DATA

An off switch you hold

Turn the AI tutor off for one child and on for another — enforced in their session.

A profile, not a shared login

Each child in their own colour, with their own record. Siblings never mix.

The parent stays the teacher

A guardian dashboard with per-course analytics, so you see where a child is stuck.

Not a cut-down home version

The same lesson player, cited tutor and spaced repetition the university edition ships.

CAPABILITIES INCLUDED	CONTROLS YOU HOLD, PER CHILD	INSTALLS — ANY DEVICE, IN THE BROWSER

How a family runs it

01 · SET UP

Rules per child

PIN, tutor, time, level.

02 · FIRST SESSIONS

Own Console

Learning Profile first.

03 · WEEKLY

Cited tutoring

Practice from completed lessons.

04 · OVERSIGHT

Guardian view

Per-course analytics.

05 · PROGRESS

Adjust as they grow

Certificates on completion.

What parents ask

Can I stop the AI tutor? Per child	Yes. It is a control on each child's profile, blocked in that child's session when off. Change it any time.
Can a child change the rules? Family PIN	The PIN gates the controls, the switcher and the parent view. You can change or remove it.
Does it meet my state's rules? Your call	We don't claim it does. FLE gives per-child records and certificates that may be useful evidence — check what your jurisdiction requires.

Not used to train models

Children's work runs the product for them, nothing more.

Readable learner model

See — and disagree with — what Arthur knows about your child.

Verifiable certificates

Issued on course completion, checkable from a public link.

The AI reasons; *the parent decides.*

Bought by the household, priced in the app — not on an institution licence. Add a profile per child and set the rules at fle.arthurgrid.ai.
