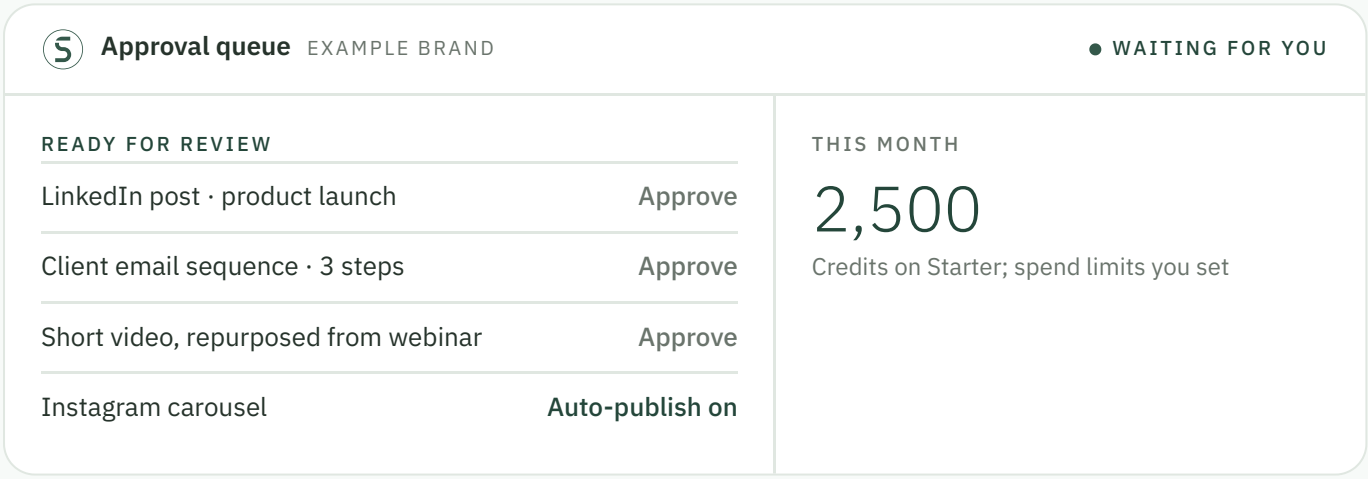
SageOps™

AGENTIC MARKETING OS

Your marketing, run by Sage. *Shipped when you say.*

SageOps is an agentic operating system for marketing. Sage researches, drafts and schedules across your channels in your brand's voice — and by default, everything it would publish or send waits in your approval queue.



ILLUSTRATIVE · EXAMPLE DATA

Nothing ships without you

By default every post and email waits in the queue. Per channel, you choose ask-first or auto-publish.

Your brand, every time

A brand kit, voices and a knowledge base Sage writes from.

Standing orders and research

Give Sage recurring work and let it research the web for what it writes.

A budget it can't exceed

Spend limits for the organization, a workspace, a person or a single run.
